Report Overview: This publication on the Status of Women in Roane County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

The Status of Women in Tennessee Counties

ROANE

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Women in Roane County earn, on average, \$10,000 less annually than their male counterparts.
- ◇ The female unemployment rate in Roane County (5.8%) is slightly higher than the overall county rate (5.6%) and than the overall Tennessee rate (5.5%).
- ◇ Women account for 45.5% of the labor force in Roane County.
- ◇ Among all working individuals in the county, 26.7% of workers are in managerial or professional positions, but among women, that percentage drops to 23.4%.

Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ Roane County residents have access to Tennessee Technology Center, Roane State Community College, University of Tennessee at Knoxville and Tennessee Technological University.
- ◇ 75.8% of women in the county have a high school diploma or the equivalent; 74.8% of all county residents and 75.9% of all Tennesseans have a high school degree or equivalent.
- ◇ 11.4% percent of women in Roane County have a four-year college degree; that is well below the state-wide average for women (18.3%) and the overall county percentage (14.8%).
- ◇ Though 22.6% of all private firms in the county are owned by women, women-owned businesses only account for 8.6% of the total sales and receipts of privately-owned firms in Roane County.
- ◇ Sixteen percent of working women in Roane County earn incomes below the poverty level.
- ◇ 10.3% of families in the county live in poverty but 33.0% of families with a female householder and no husband present are in poverty.
- ◇ Women account for 51.6% of the county's population and 52.7% of eligible voters; 6 out of 23 elected county officials are women.

ABOUT THE COUNCIL AND THIS REPORT

Roane County

The Status of Women in Tennessee Counties report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
